

**Altitude - Vertical GPS Accuracy**  
Number of Fixes at a Given Distance from Actual Height  
n = 7348

Histogram showing the frequency distribution of GPS fixes based on vertical (height) accuracy (m) from a known location.

**Altitude - Vertical GPS Accuracy**  
Percentage of Fixes within a Given Difference from Height  
n = 7348

Graph of cumulative vertical GPS fix accuracy (m) showing ~79% of all positions are within 22m of a known location.
